

Louisa Area Soccer Association Concussion Policy

All members within LASA will adopt the following policy. All members will be subject to the rules and guidelines provided.

A concussion is a brain injury that is caused by a blow to the head or body that may result in improper brain functioning. A concussion can range from mild to very severe and manifests itself differently in each individual according to Wake Forest Official Athletic Site-Sports Medicine.

I. Education about Concussions

LASA is dedicated to educating its members on how to recognize signs and symptoms of concussions, along with the protocol in dealing with this injury. Louisa will present concussion information to all coaches at the coaches' meeting at the start of each season. LASA will continue to provide members with up to date information about concussion protocol, signs and symptoms, and recovery.

LASA will have all coaches complete the [CDC's Online Training \(http://www.cdc.gov/concussion/HeadsUp/Training/index.html\)](http://www.cdc.gov/concussion/HeadsUp/Training/index.html), Further information provided by The Center For Disease Control (<http://www.cdc.gov>) and US Youth Soccer (<http://www.usyouthsoccer.org>)

II. Signs and Symptoms of Concussions may include, but are not limited to the following:

- Headaches
- Dizziness
- Nausea/Vomiting
- Ringing in Ears
- Disorientation
- Balance Problems
- Difficulty Concentrating/ Remembering
- Personality Changes
- Vision Changes
- Amnesia
- Sensitivity to light
- Loss of Consciousness
- Slow reaction time
- Slurred Speech
- Neck Pain
- Foginess

III. Protocol for Concussions – LASA Concussion Policy and Procedures are strictly based on US Youth Soccer Protocols

1. Did a Concussion Occur?

Evaluate the player for Signs and Symptoms located above.

2. Is Emergency Treatment needed? If so contact an Ambulance for transport.

This would include the following symptoms:

1. Spine and Neck injury
2. Behavior patterns change
3. Loss of Consciousness
(Any changes in level of consciousness or loss of Consciousness)

3. If a possible Concussion has occurred, but no emergency treatment is needed, what should now be done?

If any of the above symptoms have occurred, player may not re-enter the game.

When in doubt, sit it out.

Focus on these areas every 5-10 minutes for the next 1-2 hours:

1. Balance
2. Speech
3. Memory
4. Attention on topics, details

Personal Physician should evaluate Player as soon as possible.

1. Players may not re-enter competition, training or partake in any activities for the next 24 hours, even if symptoms have subsided after 15-20 minutes of initial injury.
2. The athlete must be evaluated by a licensed healthcare provider and given written clearance by this individual before returning to play. Licensed health care providers include certified athletic trainers licensed in Virginia, a medical doctor (MD), preferably a neurologist or a primary care physician, a doctor of osteopathy (DO) or a neuropsychologist PhD.

3. All Concussions must be reported by the player's coach to the LASA Recreational Commissioner immediately upon diagnosis by a certified professional. No player can return to action until cleared for action and the Recreational Commissioner is notified.

IV. Return to Play Guidelines after Sustaining a Concussion Rehabilitation Stage Functional Exercise

Objective

1. Light

aerobic

Exercise

Walking or stationary

Cycling. No resistance training

Increase HR

2. Sport-specific exercise

Running drills, ball-handling drills, no head impact activities

Add movement

3. Non-contact training drills

Slowly progress to more complex training drills. May start progressive resistance training.

Exercise and coordination

4. Full contact practice

Following a player's medical clearance; resume participation in normal training activities

Restore confidence, assessment of functional skills

5. Return to play

Normal game play
